VERENA KUNI – HOW2:HOW2 – HOW2:HOW2:NODE

how2:how2
how does this work? how was this made? how do you do it?
how is the knowledge about things, their construction, production and handling processed and facilitated?
how are how-to's made?
how2:how2 is a research project dedicated to how2's.

how2:how2:node
at node10, how2:how2 will ask makers and thinkers, participants, visitors, and passers-by to contribute a how-to to the research collection.
a simple entry form will be available online (see below) and at the node festival lounge.
if possible, the how-to's collected at node10 will be presented and made available during the festival.

to learn more about the project, meet us at node10 and join our happy new how2:how2:node session on thu, november 18, 2010 – 09:00 p.m. at frankfurter kunstverein (vk together with ralf schreiber and christian faubel)

we're planning to publish and share all entries to the how2:how2 research collection online – thus make sure all materials can be licensed under cc-by-nc-sa (or an equivalent licence).
for more info pls. contact verena kuni (verena@kuni.org)
www.under-construction.cc/how2

how2:how2:share
node festival is about knowledge sharing and about skill sharing, right?
that's why would like to ask you to share a how-to with us and with everybody else.
the challenge is: can you create a how-to in six simple steps from scratch?
give us a try!
your favourite diy project is too complex?
ok. why not choose an alterative: perhaps to show'n'tell us about your favorite cheat, trick or failure in six steps is easier?
and then, of course, we have also a bonus form for the rebels and wizards.
yes, we're pretty sure everybody has a how-to to share!

how2:doit
step 1: decide about your how2
step 2: select a form
step 3: choose your tools, prepare your stuff, do & document your project
step 4: fill the form with text + pics
step 5: print to pdf
step 6: send it to how2@node-forum.org

alternatives for step 5 + step 6:
in case you prefer to download + print the selected form first and to fill it the analog way (handwritten / pasted texts, drawings, fotos) you may:
* rescan the paper > print to pdf > send it to how2@node-forum.org
* bring the paper to the node counter (you will get your original back)
in case you cannot print the digital form to pdf and the file is larger than 3MB please bring the data on a stick or cd to the node counter (you will get your stick / cd back)

how?

create & share your how-to however you want to.
send the pdf to how2@node-forum.org
or bring the data to the node counter at frankfurter kunstverein.

form:

your name: _____   your website: _____

title: _____   function: _____
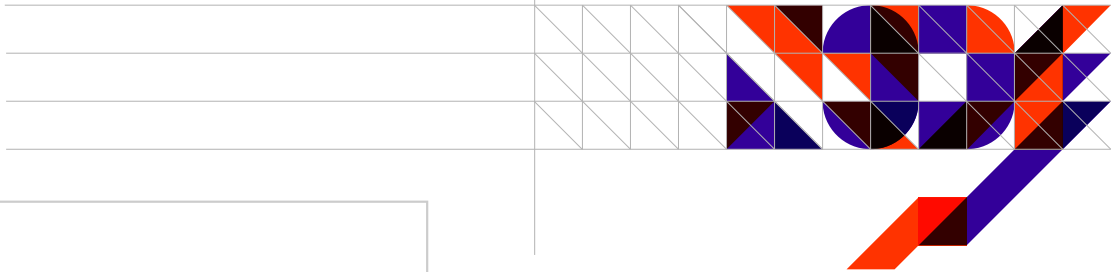

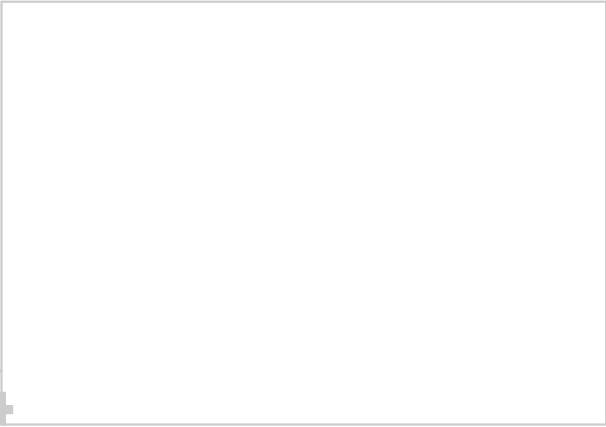

1 Materials and Tools

_____

2

_____

3

_____

pls. note: we'd recommend to use landscape format for the pics, as the height is limited by the form
moreover, pls. make sure all pics (and text parts) can be published under cc-by-nc-sa licence.
